Exploration and Irony is a great country study much like *Language and Power*, though Anderson seems less tormented by Thailand. Exploration seems more distant as Thailand is analyzed through a series of "objective" historical conditions against other countries, which serves to make the country seem less unique. One gains great comparable knowledge of Siam on a variety of issues, but what makes all those issues matter is the theoretical framework that underlies the study.

Regarding the processing of irony, evidence for the discussed models mainly stems from behavioral studies that compared reading or reaction times for the processing of ironic and literal sentences. In a study by Dews and Winner (1999), longer reaction times were found for sentences that had an ironic meaning compared to their

Irony and surprise are common literary devices authors use to communicate their ideas when writing literary works. Irony allows the writer to suggest an interpretation that is different from the literal meaning of the words used in the text. The element of surprise allows the writer to manipulate the reader's expectations and take them somewhere [...]
