G 3408 Cat Engine

The Cat 3408 is a diesel internal

Online Library G 3408 Cat Engine

combustion engine. A report on the Georgia State University website notes that, unlike an Otto cycle engine, which uses a spark plug to ignite gasoline fuel, a diesel engine uses compression to generate intense heat that causes the combustion of diesel fuel.

CAT engines have a
history of excellent

Online Library G 3408 Cat Engine

performance and reliability, and the 3408 is no exception. The 3408 is a V8 variant of the popular 3406 engine. It was first introduced in the 1970s and discontinued around 1985. Although considered pricey at the time (and a bit on the heavy side) it soon gained popularity, especially as a marine engine.

The 3408 was a good engine, but I think the in-line offerings of the day were better from CAT for hi-performance reasons. The 1693 will make a ton of power reliably, but it doesn't rev-up as quickly as a 3408 will. For a V-8

After I get it started it runs just barely enough to be able to work.

Once it gets bogged down it stalls out. It only runs around full throttle if you try to idle it down it dies. It black smokes really bad and has been using about 10 gal of diesel a hour when running. I'm not sure how that compares to other 3408's
