HTML Cheat Sheet (Updated With New HTML5 Tags) - WebsiteSetup
HTML - Overview HTML stands for Hypertext Markup Language, and it is the most widely used language to write Web Pages. Hypertextrefers to the way in which Web pages (HTML documents) are linked together. Thus, the link available on a webpage is called Hypertext.

HTML - Quick Guide - Tutorialspoint
This document serves as a reference for the HTML syntax, vocabulary and its associated DOM APIs and is intended for web site and application developers, publishers, tutorial writers and teachers and their students. That is, people who write documents using HTML, or who teach others to do so.

HTML5 Reference - World Wide Web Consortium
Use blank lines to separate block-level HTML elements like <div>, <table>, <pre>, and <p> from the surrounding content. Try not to indent the tags with tabs or spaces — that can interfere with the formatting. You can't use Markdown syntax inside block-level HTML tags. For example, <p>italic and **bold**</p> won't work.

Basic Syntax | Markdown Guide
HTML is the standard markup language for creating Web pages. HTML describes the structure of a Web page. HTML consists of a series of elements. HTML elements tell the browser how to display the content. HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.

Introduction to HTML - W3Schools
To cite either a computer program or piece of source code you will need the following information: - Author(s) name (Individual or corporation) - Date - Title of program/source code - Code version - Type (e.g. computer program, source code) - Web address or publisher (e.g. program publisher, URL)

Citing Programming Code - Computer Science & Computer ...
Client-side JavaScript is the most common form of the language. The script should be included in or referenced by an HTML document for the code to be interpreted by the browser. It means that a web page need not be a static HTML, but can include programs that interact with the user, control the browser, and dynamically create HTML content.

JavaScript - Quick Guide - Tutorialspoint
XHTML 2 is dead, long live HTML5! According to W3C News Archive, XHTML 2 working group is expected to stop work end of 2009 and W3C is planning to increase resources on HTML5 instead. And even although HTML 5 won't be completely supported until 2022 (yes, 2022), it doesn’t mean that it won’t be widely adopted within the foreseeable future.
