Human Population

Growth: Answer Key

There are two types of migration: Immigration is the movement of individuals into a population from other areas. This increases the population size and growth rate.

Acces PDF

Patterns Of

Human Population

Human Geography

Population growth is determined by the net recruitment rate of individuals to the population. Population growth in a given generation is a linear combination of its initial size, birth, death, immigration, and emigration rates. All four parameters are influenced by the ratio between the sexes in the population.
